

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

HORNED LARK.—On April 8, 1895, a female Horned Lark (*Otocoris alpestris*) was taken in a field near Oberlin. The condition of its ovaries and plumage gave unmistakable evidence that the bird was sitting. A pair taken on March 16, 1896, proved to be *praticola*. Other specimens in the College Museum also indicate that in northern Ohio the breeding range of *alpestris* and of *praticola* overlap. No specimens of *praticola* have yet been taken in December and January, nor early February, which would indicate that its winter range is considerably south of this point. It is unfortunate that the two forms are so nearly alike that they cannot be distinguished with certainty in the field.—LYNDS JONES, *Oberlin, Ohio*.

THE WORK OF COMMITTEES.

As the nesting season closes and the autumn draws on, we need to remind ourselves that committees on special investigation are waiting for the notes collected during the spring and summer. It is not only the new facts which may have been learned that will be valuable material for these committees, but the notes on usual habits will be just as valuable, and as highly appreciated. The important thing is to send in your notes. Mr. J. E. Dickinson, 1122 S. Winnebago St., Rockford, Ill., will receive notes on Migration; Mr. H. C. Higgins, Cincinnati, N. Y., on Nesting; Mr. Howard P. Mitchell, Mt. Sterling, Wis., on Nestling Down; Mr. Frank L. Burns, Berwyn, Pa., on the Flicker; Mr. Lynds Jones, Oberlin, Ohio, on Food and Song; Mr. Stephen J. Adams, Cornish, Me., on Swallows. The greater the mass of notes to be worked over the more accurate will be the final report. Do not allow yourself to delay sending your notes to these committees until they are forgotten, but send at once and so help to bring about a speedy final report.

CHANGE OF ADDRESS.

If you change your address do not fail to notify the editor at once. Or if you have not been receiving the BULLETIN regularly do not fail to send your full address at once. Several members, whose addresses had been changed without notifying the Editor of the change, have complained that they did not receive the BULLETIN.
